

Experienced voiceover with deep resonant RP voice

Broadcast quality studio – with ipDTL facility

Website: [www.peterbakervoiceover.com](http://www.peterbakervoiceover.com)

I have been in broadcasting all my life, presenting for both TV & radio stations for the BBC and ITV in the UK. I have been a professional voiceover for over 30 years covering a wide range of outputs; TV commercials, audio books, promos and training videos for many leading international organisations; I am also often booked as a live "Voice Of God" for award ceremonies as I am used to the pressures of a live "on-air" environment with strict timings and constant changes to the script and running order!

The studio I have is broadcast quality with Neumann U87 and TLM 103 microphones; you can direct me via video Skype or I have ipDTL facility and you can log in via my website home page. I am a skilled audio editor using Adobe Audition. Some voiceovers need to be sync'd to video, I can offer this in house using Adobe Premiere Pro. I can also offer in-vision presentation as my video studio is equipped with green screen and Autocue facilities; I am a former BBC TV news presenter.
